Product professional with 3+ years across enterprise POS, CPaaS, and 0→1 marketplace design — combining customer discovery, roadmap prioritization, and PRD authoring with direct enterprise customer exposure.

PROFESSIONAL EXPERIENCE

SDR II — Product & Customer Insights | Acefone

Jun 2025 – Present

Delhi NCR · Enterprise CPaaS & cloud communications

- **Enterprise deal-loss analysis:** Owned a full review of closed-lost opportunities, interviewing 20+ enterprise customers and developing three JTBD-based personas that separated genuine product gaps from non-product factors.
- **Roadmap prioritization (RICE):** Prioritized four strategic roadmap initiatives, recommending AI Voicebot investment on the basis of technical feasibility and business impact analysis.
- **Competitive benchmarking:** Built a benchmarking framework across leading CPaaS platforms — comparing pricing, UX, and feature depth — adopted by the product team as a standing reference.
- **Voice-of-customer pipeline:** Synthesized recurring pain points from enterprise sales conversations into structured product feedback, influencing feature prioritization and supporting consistent month-over-month revenue growth.
- **Post-call analytics adoption:** Championed replacing manual call reviews with post-call analytics, improving customer visibility and contributing to a meaningful lift in quarterly revenue.

Associate Product Manager | Satel Systems

Aug 2023 – May 2025

Delhi NCR · EMEA · US · UK

- Partnered with product and engineering to launch a mobile POS solution, opening a new revenue stream that grew steadily quarter over quarter from launch.
- Collaborated with engineering to define API requirements and acceptance criteria for enterprise POS workflows.
- Coordinated cross-functional delivery across product, engineering, and sales, ensuring successful rollout to enterprise customers across EMEA, US, and UK.
- Improved product discoverability through structured metadata and SEO enhancements, driving a sustained increase in qualified traffic.

Product Intern | Choco Global

Jun 2022 – Jul 2023

Delhi NCR

- Led customer discovery and requirement gathering, translating business needs into detailed PRDs and collaborating with design to deliver development-ready specifications.
- Launched marketplace distribution initiatives that expanded customer reach and grew revenue month over month.
- Redesigned the customer onboarding experience by simplifying key workflow steps, improving early-stage retention.

PROJECTS

KaamSetu — Verified Work, Verified Workers (0→1 Marketplace) | Self-directed

- **Problem & scoping:** Designed a two-sided marketplace around identity verification, reducing twelve candidate workflows into a single trust-first MVP while intentionally deferring non-critical features.
- **PRD & specs:** Authored a full PRD — problem statement, three user personas, a North Star metric, a phased roadmap (MVP → Retention → Scale), and functional requirements across 12 screens.
- **Prototype:** Built a high-fidelity interactive prototype covering onboarding, identity verification, job discovery, and verification tracking for MVP validation.

SKILLS & EXPERTISE

- **Product:** RICE Prioritization · Roadmapping · JTBD · User Personas · Product Gap Analysis · Competitor Analysis & Benchmarking · Customer Discovery · OKR / KPI Tracking · 0→1 Product Design · A/B Testing · Agile · Scrum · Prototyping · Stakeholder Management · PRD Writing
